

PERFORMANCE CHARACTERISTICS

No.4

1. Unique product type identification code: **Quartz sand.**
2. Type, batch or serial number or any other element for identification of the construction product: **Quartz sand 2/0.05, fraction 0.4-0.8 mm.**
3. Product is valid by technical specification JST 5411146-01:2024.
4. Manufacturer's determined use of the construction project: **manufacture of glass with high light transmission, polymer concrete, porcelain, glass fiber, aggregates etc.**
5. Manufacturer's name, registered commercial name or registered product trademark, and address: **UAB Anykščių kvarcas, Troškūnų g. 5, Anykščiai, LT-29100.**
6. System of the evaluation of the constancy of performance, testing and marking of the construction product: **2+ system.**
7. Certification body **UAB Statybos produkcijos sertifikavimo centras, identification No. 1397**, performed the initial manufacture and manufacturing control testing based on the initial product type test and issued the certificate **No. SPSC-9596** of the constancy of the performance characteristics of the construction product and carries out constant supervision and assessment of the manufacturing control.
8. Declared performance characteristics:

No.	Quality indicators	Norm	Determination methods
1.	Silica oxide content (SiO ₂) % of total mass, no less	98.5	JST 5411146-01:2022
2.	Silica oxide content (Fe ₂ O ₃) % of total mass, no more	0.05	JST 5411146-01:2022
3.	Aluminium oxide content (Al ₂ O ₃) % of total mass, no more	0.6	JST 5411146-01:2022
4.	Humidity %, not exceeding	0.5	LST EN 1097-5:2008
5.	Sand particles larger than 0.8 mm, %, not exceeding	30.0	LST EN 933-1:2012
6.	Sand particles finer than 0.4 mm %, not exceeding	15.0	LST EN 933-1:2012
7.	Radioactivity, Bq/kg	13.7	IEC 61452:2021

9. The product performance characteristics indicated in items 1 and 2 meet the performance values declared in item 8.
8. The declaration of performance of these characteristics was issued solely with responsibility of the manufacturer indicated in paragraph 5.
